

חברת תרו אינטרנשיונל בע"מ מבקשת להודיע על עדכונים בעלון לצרכן של התכשיר שבנדון

Diprofol 2% vials

מרכיב פעיל:

Propofol 20mg/ml

ההתוויה המאושרת לתכשיר:

Diprofol 2% is a short-acting intravenous general anaesthetic for:

- induction and maintenance of general anaesthesia in adults and children > 3 years.
- sedation of ventilated patients >16 years of age in the intensive care unit.
- sedation for diagnostic and surgical procedures, alone or in combination with local or regional anaesthesia in adults and children > 3 years.

עדכונים בעלון לרופא:

4.5 Interaction with other medicinal products and other forms of interaction

A need for lower propofol doses has been observed in patients taking midazolam. The co-administration of propofol with midazolam is likely to result in enhanced sedation and respiratory depression. When used concomitantly, a dose reduction of propofol should be considered.
