

Consumer leaflet for a Veterinary Product

This medicine is marketed according to a veterinarian's prescription only.
For animal use only

1. Name of the veterinary medicine, form and strength

Diazigal premix veterinary
Powder for mixing in feed mixture

2. Active ingredients:

Sulfadiazine 25 % w/w
Trimethoprim 5 % w/w

For the list of excipients see section 13 "Additional information"

3. What is the medicine intended for

For the treatment of infections caused by susceptible bacteria in broiler chicken, turkeys, Pre-ruminating calves and fish.

Therapeutic group: anti microbial product containing sulfonamide and trimethoprim combination

4. Contraindications

Do not use in calves with mature rumen. Do not use in animals with severe disorders in the liver, kidneys or blood system.

Do not use in cases of known sensitivity to sulfonamides or to any other ingredient of the medicine.

5. Side Effects

Precipitation of crystals in the kidneys is a theoretical risk and was rarely reported. Hypersensitivity to sulfonamides is also possible but rare.

Side effects can be reported to the Ministry of Health by clicking on the link "Adverse Drug Reactions Report" that appears on the home page of the Ministry of Health web site (www.health.gov.il), which leads to an online form for reporting side effects. Alternatively you can use the following link: <https://sideeffects.health.gov.il/>

6. Target animals

Broiler chickens
Turkeys
Pre-ruminating calves
Fish

7. Dosage and administration

The recommended dosage in turkeys and broiler chickens is 1 kg of Diazigal Premix in 1000 kg of feed mixture for 5-7 days.

Calves: 3 kg of Diazigal Premix in 1000 kg of feed for 7 days.

Fish: 240 gram of Diazigal Premix per 1 ton of fish live weight, for 7-10 days. The consumption of feed in fish varies according to the water temperature. Therefore, consult the veterinarian for adjusting the dosage.

8. How to use the product

To be administered in the feed mixture according to the veterinarian instructions.

9. Withdrawal Time

Broiler chickens: 8 days
Turkeys: 5 days
Calves: 21 days
Fish: 30 days at temperature of 23°C

10. Warnings

Special warnings for use of the medicine in target animals

Broiler chickens and turkeys: in case of reduced appetite, adjust the medicine concentration in the feed in order to achieve the correct dosage. In order to prevent crystal precipitation in the kidneys, adequate consumption of water is essential particularly in animals with renal disorder. Special warnings regarding the safety for the person administering the veterinary medicinal product to animals while mixing the medicine in the feed mixture, avoid contact of medicine with skin, eyes and inhalation the medicine by using suitable safety measures. Thus, you should use gloves and safety face mask when treating feed with this product. Wash hands after using this product. Sulfonamides may cause allergic reactions following exposure by injection, inhalation, swallowing or contact with the skin. Hypersensitivity to sulfonamides may cause cross-sensitivity with other antibiotics. Sometimes the allergic reactions to these substances may be serious.

1. Avoid contact with the medicine in case of known sensitivity to the sulfonamides.
2. If you develop symptoms such as skin rash or breathing difficulties, refer to your doctor and bring this leaflet with you.
