

Darzalex PATIENTS: Provide this card to healthcare providers BEFORE blood transfusion and carry it for 6 months after treatment has ended. For further information please refer to the Patient Information Leaflet

Patient ID Card for Darzalex

Name: _____

I am taking the following medication:

Daratumumab antibody product for the treatment of multiple myeloma or AL Amyloidosis*

Stopped taking this medication _____ / _____ / _____

*For Darzalex 120 mg/ml SC, 1800 mg use only DD MM YYYY

Dear Healthcare Provider,

Daratumumab is associated with the risk of interference with blood typing.

The Indirect Coombs test may show positive results in patients taking daratumumab, even in the absence of antibodies to minor blood antigens in the patient's serum.

The chance of this disturbance can persist for up to 6 months after the last dose of daratumumab. The determination of a patient's ABO and Rh blood type are not impacted.

If an emergency transfusion is required, non-cross-matched, ABO/RhD-compatible RBCs can be given per local blood bank practices.

Before starting daratumumab my blood test results collected on _____ / _____ / _____ were:

DD MM YYYY

Blood type: A B AB O Rh+ Rh-

Indirect Coombs test (antibody screen) was:

Negative Positive for the following antibodies:

Contact details of the institution where the blood tests were performed: _____

For further information, read the package leaflet. Side effects can be reported to the Ministry of Health by using an online form for reporting side effects found on the Ministry of Health homepage: www.health.gov.il, or by entering the link: <https://sideeffects.health.gov.il/>.

In addition, report directly to Johnson & Johnson Israel Company 09-9591111.
