#### Cardiac disorders

Uncommon: Arrhythmias, chest pain with or without ST segment depression, bradycardia.

Rare: QTc prolongation (including Torsade de Pointes)

Not known: Myocardial ischemia \*

.....

\*These types of adverse drug reactions have been derived from post-marketing experience with Ondansetron - Fresenius via spontaneous case reports and literature cases. Because these reactions are reported voluntarily from a population of uncertain size, it is not possible to reliably estimate their frequency which is therefore categorized as not known.

קיימים עדכונים נוספים . למידע נוסף יש לעיין בעלון לרופא המעודכן
