## **Safety information for patients of childbearing potential:**

- CAMZYOS® may cause harm to an unborn baby if used during pregnancy
- CAMZYOS® must not be taken if you are pregnant or are of childbearing potential and are not using an effective method of contraception
- If you are able to get pregnant, you must use an effective method of contraception throughout treatment and for 4 months after your last dose. CAMZYOS® may reduce how well hormonal birth control works. You should discuss with your doctor which method(s) of contraception is/are the most suitable for you.
- Talk to your doctor if you are considering becoming pregnant
- If you suspect that you may be pregnant or are pregnant, you must inform your prescriber or doctor **immediately**

---

### Safety information for all patients:

- Tell your prescriber or doctor or seek other medical attention **immediately** if you experience new or worsening symptoms of heart failure, including shortness of breath, chest pain, fatigue, a racing heart (palpitations), leg swelling or rapid weight gain
- Tell your prescriber or doctor of any new or existing medical conditions
- Tell your prescriber, doctor or pharmacist before starting new medicines (including prescription and those available over the counter) or herbal supplements. Do not stop taking or change the dose of any medicine or herbal supplement that you are already taking without talking to your doctor or pharmacist first, as other medicines can affect how well CAMZYOS<sup>®</sup> works
- Tell any healthcare professional who sees you if any side effects occur while you are taking CAMZYOS<sup>®</sup>
- Remember to keep all appointments, especially echocardiogram (also known as echo) appointments, to monitor your heart's health
