Patient package insert in accordance with the Pharmacists'

Regulations (Preparations) – 1986

Non-prescription medicine

iodo-vit Ointment

Composition: Active ingredient and its concentration:

Povidone Iodine 10%

Equivalent to 1% available iodine

For the list of inactive ingredients, see section 6 – “Additional information”.

Read the entire leaflet carefully before using this medicine. This leaflet contains concise information about the medicine. If you have any further questions, refer to the doctor or the pharmacist.

This medicine is intended for adults, children and adolescents. You must use it correctly. Consult the pharmacist if you need additional information.

Refer to a doctor if the symptoms worsen or do not improve after 7 days.

1. What is this medicine intended for?

This medicine is intended for the disinfection of wounds, scratches, superficial burns and skin infections.

Therapeutic group: Antiseptic.

2. Before using this medicine

Do not use this medicine if:

- There is a known sensitivity to iodine.
- You are sensitive to the active ingredient or to any of the additional ingredients contained in this medicine.

Special warnings regarding the use of this medicine:

Do not use this medicine without consulting a doctor before starting treatment if:

- You suffer or have suffered in the past from thyroid malfunction.
- You have a deep wound or a severe burn.
- The wound was caused by an animal bite.
- You are sensitive to any food or medicine. If you are taking or have recently taken other medicines, including non-prescription medicines or food supplements, tell the doctor or the pharmacist.

Warnings:

- Do not use this medicine frequently or for prolonged periods of time exceeding one week without consulting a doctor.
- If the wound does not respond to the treatment, or if it worsens, consult a doctor.

3. How should this medicine be used?

Check with the doctor or the pharmacist if you are unsure.

The usual dose in the absence of other instructions from a doctor: Clean the affected area.

Apply to the wound or the treated area 2-4 times per day.

You can also apply it to gauze and cover it with a bandage.

Avoid application to an extensive area of affected skin.

Do not exceed the recommended dosage.

Spots on the body or on cotton fabric can be cleaned by rinsing with water.

Please note:

Do not swallow! This medicine is intended for external use only. If you have accidentally swallowed this medicine, or if a child has swallowed this medicine, go to a hospital ER immediately and bring the medicine package with you.

Do not take medicine in the dark! Check the label and the dose each time you take medicine. Wear glasses if you need them. If you have additional questions regarding the use of this medicine, consult a doctor or pharmacist.

4. Side effects

Like every medicine, the use of Iodo-Vit ointment, in addition to its desired activity, may cause side effects in some users. Do not be alarmed while reading the list of side effects. You may not experience any of them.

Refer to a doctor immediately if:

- if you develop a rash, inflammation and/or local irritation, stop treatment and refer to a doctor.
- if you experience any side effect that is not mentioned in this leaflet, or if you experience a change in your general feeling, consult a doctor immediately.

5. How should this medicine be stored?

Prevent poisoning! This medicine, and every other medicine, should be stored in a closed place out of the reach of children and/or infants in order to prevent poisoning.

Do not induce vomiting without explicit instruction from a doctor!

• **Store in a dark place with a temperature of under 25°C.**

• **Do not use this medicine after the expiry date** (Exp. date) on the packaging. The expiry date refers to the last day of that month.

• Even if stored under the recommended packaging and storage conditions, medicines can be stored for only a limited period of time. In case of doubt, consult the pharmacist who supplied this medicine to you.

• Store in the original package. Do not store different medicines in the same package.

• Can be used for up to 6 months after opening the package for the first time, but not later than the expiry date on the packaging.
